PROFESSIONAL SUMMARY

AI Data Specialist with 4+ years of remote, project-based experience evaluating and ranking LLM outputs, producing RLHF preference data, and quality-reviewing annotation work across text, image, audio, and video. Work includes rubric-based scoring, side-by-side response ranking with written justifications, hallucination and misinformation detection, and QC review (92 BLEND QC assignments completed above the 95% accuracy threshold). B.A. Philosophy and English (CGPA 4.38/5.00; Best Graduating Student, Philosophy), with training in logic, ethics, and linguistics applied to reasoning, factuality, and safety evaluation. Native English and Yoruba speaker with experience applying Nigerian and African cultural context in AI evaluation.

CORE EXPERTISE

LLM Evaluation & Ranking: rubric-based scoring, A/B pairwise comparison, instruction-following and reasoning assessment, written ranking justifications

RLHF & Human Preference Data: preference ranking, structured feedback, original fact-checked responses for AI training

Factuality & Safety: hallucination and misinformation detection, unsupported-claim identification, policy compliance and content safety review

NLP & Text Annotation: text classification, named entity recognition (NER), sentiment and intent classification, annotation guideline compliance

Multimodal Evaluation: AI image and video edit ranking, visual quality evaluation, prompt adherence, egocentric video labeling, bounding boxes, audio transcription

Annotation QA & Peer Review: QC review, peer validation, dataset validation and cleaning, software QA testing and bug reporting

Reasoning & Language: formal logic, fallacy analysis, ethical reasoning, linguistic analysis; native English and Yoruba; Nigerian/African cultural-context review

Tools: ChatGPT, Claude, Gemini, Label Studio, Google Workspace, Microsoft Office, Slack, Discord, Zoom, Trello

PROFESSIONAL EXPERIENCE

AI Data & LLM Evaluation Specialist 2022 – Present
Freelance / contract / project-based. The engagements below ran concurrently on AI data platforms and were project-based, not conventional full-time employment.

AI Data Contributor & LLM Evaluator, Outlier (Scale AI) Oct 2022 – Present

- Evaluated thousands of LLM responses against structured rubrics for factual correctness, reasoning, instruction adherence, completeness, clarity, tone, and safety.
- Ran side-by-side comparisons to select the stronger output, with a written justification for every ranking decision.
- Flagged hallucinations, misinformation, unsupported claims, and reasoning failures, applying RLHF principles to align outputs with user intent.
- Wrote original, fact-checked responses for AI training; fed recurring model weaknesses into improvement cycles.
- Reviewed multimodal prompt-response pairs and content for coherence, policy compliance, and safety.
- Worked with QA specialists and distributed teams to keep annotation consistent as guidelines changed.

Image & Video Edit Ranking Annotator / QC Reviewer, BLEND 2025 – Present

- Completed 92 model-training assignments as a QC specialist, keeping post-QC accuracy above the required 95% threshold.
- Ranked A/B AI image and video edits across 8 axes, including prompt adherence, reference fidelity, placement, realism, and artifacts.
- Applied e-commerce catalog and UGC guidelines; marked ambiguous cases 'Unsure' per protocol to protect dataset integrity.

AI Data Annotator & Visual Quality Evaluator, Mindrift (Toloka) 2025 – Present

- Passed qualification with 80%+ accuracy to unlock paid production tasks.
- Compared paired AI images on aesthetics, technical integrity (anatomy, artifacts, lighting), and prompt relevance.
- Validated annotated video pairs against 7 metric labels and priority rules; contributed to a face-occlusion video dataset and data collection tasks.

AI Language & Content Evaluator / Peer Validator, Appen / Crowdgen Mar 2023 – Apr 2026

- Evaluated conversational AI for coherence, tone, and correctness; reviewed text classification and alignment tasks.

- Validated peer annotations with structured written feedback; applied Nigerian and African cultural context in locally relevant reviews.
- Completed image classification, bounding box, text labeling, and audio transcription tasks, preserving tone, dialect, and speaker intent while following data privacy and ethical guidelines.

QA Crowd Tester, Test.io
Jan 2026 – Present

- Tested web and mobile products for functionality, usability, and visual consistency in structured test cycles.
- Earned 10 badges for detailed, reproducible bug reports on live projects.

AI Rater / Content Evaluator, TELUS International AI
Jan 2023 – Jun 2026

- Rated search results and AI responses for relevance and usefulness; classified user intent while meeting productivity targets.

AI Data Specialist, Defined.ai
2022 – 2025

- Evaluated AI outputs for accuracy, relevance, tone, and instruction compliance; reviewed and corrected annotated datasets.
- Flagged bias, ambiguity, and ethical risks; took part in quality calibration exercises with distributed teams.

Egocentric Video Annotation Specialist, Atlas Capture
Jan 2026 – Present

- Labeled first-person video for computer vision datasets: hand-object interactions, object transfers, and temporal action sequences.
- Applied strict labeling conventions (imperative voice, segment limits, action-verb taxonomy); flagged frame-level inconsistencies in written reports.

NLP Data Annotator, micro1
Aug 2023 – Aug 2024

- Performed sentiment analysis, named entity recognition (NER), and intent classification; cross-validated outputs against guidelines before submission.

Freelance AI Data Annotator & Response Evaluation Specialist (Self-Employed)
Apr 2024 – Present

- Labeled and classified text datasets for supervised ML and NLP use cases; ran QA passes and cleaned datasets before delivery.
- Ranked AI responses on correctness, completeness, clarity, and helpfulness, verifying factual claims through independent research.

ADDITIONAL EXPERIENCE

Virtual Assistant, Private Client (USA)
Jun 2025 – Oct 2025

- Managed email, scheduling, web research, data entry, and CRM updates across time zones.

Freelance Content Writer & Editor
Feb 2023 – Mar 2024

- Wrote, edited, and proofread articles and technical documentation, verifying facts through online research.

Volunteer Academic Mentor, Obafemi Awolowo University
Apr 2024 – Dec 2024

- Mentored students on study strategies and career direction; organized academic development workshops.

SELECTED PROJECTS

AI Ethics & Governance Project

- Studied and applied the NIST AI Risk Management Framework and EU AI Act to an AI governance framework for ethical deployment.
- Analyzed algorithmic bias and privacy risks and outlined audit and accountability safeguards.

Final-Year Research: Communal Obligations and Individual Rights in African Social Structures
2024

- Interviewed 8 community leaders and 4 scholars; analyzed texts and transcripts using conceptual and thematic analysis.
- Authored a 5,000-word paper and presented findings at a university research symposium.

EDUCATION

B.A. Philosophy and English, Obafemi Awolowo University (OAU), Ile-Ife, Nigeria
2019 – 2024

- CGPA 4.38/5.00, Second Class Upper Division; Best Graduating Student, Department of Philosophy (2024).
- Coursework: formal logic, fallacy analysis, ethical reasoning, linguistics, semantics, discourse analysis.

CERTIFICATIONS

- AI for Everyone, Coursera (2023)
- Data Annotation Certificate, Appen Academy (2023)
- Quality Management Systems (QMS) Training (2024)
- Software Testing & QA, Test.io (2026)
